Greetings,

Thank you for reaching out to us.

Only IPs running mail servers would need to be removed from this reputation list.

IPs not running mail servers would still have the ability to send mail using an email service (such as gmail).

Does this IP run a mail server?

The PTR/reverse DNS for this IP is:

host 81.90.181.238

238.181.90.81.in-addr.arpa domain name pointer umi.naqiao.hk

From: Pest Control Officer

Re: [SPAMRATS REMOVAL REQUEST BY ADMIN - ...list

Is the domain 'naqiao.hk' owned by the person this IP is assigned to?

If this IP does run a mail server, who manages them and what kind of email is being sent?

'naqiao.hk' does not seem to resolve to any website with information of the company.

Thanks,
